

UniMart Product Backlog

Backlog Status Summary

Completed Areas	Partial Areas	Still Outstanding
• Student registration, login, and OTP verification • Profile viewing and editing • Listing CRUD with image upload • Marketplace browsing and keyword search • Seller dashboard with analytics	• User verification done but 3-role model incomplete • Buyer browsing exists but condition/price filters missing • Analytics exist for seller listings only	• Trade Facility Staff and Admin workflows • In-app messaging and negotiation • Payments and partial-payment handling • Ratings, reviews, and moderation • SA data integration and AI price suggestions

Section 1: User Verification and Account Access

Requirement: A 3rd party identity provider must support 3 roles — Student, Trade Facility Staff, and Admin.

ID	Backlog Item	Status	Notes
UV-1	Integrate with a 3rd-party identity provider for registration and sign-in.	Completed	Supabase Auth is used.
UV-2	Allow new users to register with email and password.	Completed	Sign-up flow with OTP verification implemented.
UV-3	Verify email ownership before allowing full account access.	Completed	Email OTP verification implemented.
UV-4	Support Student, Trade Facility Staff, and Admin roles.	Partially Completed	Student accounts only. Staff and Admin workflows not implemented.
UV-5	Restrict features and data by role.	Still To Be Completed	Row security exists for listings, but role-based gating for Staff/Admin is not in place.

Section 2: Listing Management

Requirement: Students can create, edit, and remove listings with photos, descriptions, categories, condition ratings, and prices. Listings indicate sale, trade, or either.

ID	Backlog Item	Status	Notes
LM-1	Create a listing with title, description, category, condition, and price.	Completed	Implemented and persisted to Supabase.
LM-2	Upload and display listing photos.	Completed	Supabase Storage bucket in use.
LM-3	Edit an existing listing.	Completed	Users can reload and update listings.
LM-4	Delete a listing.	Completed	RLS-backed delete permissions implemented.
LM-5	Mark a listing as sale, trade, or both.	Partially Completed	is_tradeable flag exists. Dedicated mode for sale vs trade vs both would improve alignment.
LM-6	Show seller-owned listings in a management view.	Completed	Management page lists the seller's listings with status updates.

Section 3: Buyer Experience

Requirement: Buyers can search, filter by category/condition/price, and initiate purchase or trade offers. Seller rating and transaction history visible before committing.

ID	Backlog Item	Status	Notes
BE-1	Browse active marketplace listings.	Completed	Live Supabase data on search.html.
BE-2	Search listings by keyword.	Completed	Matches title, description, category, condition, and price.
BE-3	Filter listings by category.	Completed	Category chips implemented.
BE-4	Filter listings by condition.	Still To Be Completed	Condition stored in data but no filter control yet.
BE-5	Filter listings by price range.	Still To Be Completed	Price in data but no min/max filter UI yet.
BE-6	Open a listing to view full details.	Completed	Card click opens a listing details modal.
BE-7	Initiate a purchase offer.	Still To Be Completed	No purchase flow exists yet.
BE-8	Initiate a trade offer.	Still To Be Completed	No trade negotiation or offer workflow exists yet.
BE-9	Show seller rating and transaction history on listing details.	Still To Be Completed	Requires ratings and transaction tables.

Section 4: Trade Facility Management

Requirement: Staff manage drop-off/collection bookings. Students book slots online. Staff confirm item receipt and release. Admins configure hours and slot capacity.

ID	Backlog Item	Status	Notes
TF-1	Create Trade Facility Staff role and secured staff views.	Still To Be Completed	Not yet started.
TF-2	Allow students to book a drop-off or collection slot online.	Still To Be Completed	Not yet started.
TF-3	Allow staff to confirm item receipt and collection release.	Still To Be Completed	Not yet started.
TF-4	Track transaction status around the trade facility workflow.	Still To Be Completed	Requires transaction and booking domains.
TF-5	Allow Admin to configure operating hours and slot capacity.	Still To Be Completed	Not yet started.

Section 5: In-App Messaging

Requirement: Buyers and sellers communicate via built-in chat to negotiate and arrange details before committing to a trade facility booking.

ID	Backlog Item	Status	Notes
MSG-1	Create conversations between buyers and sellers.	Still To Be Completed	No messaging schema or UI exists yet.

ID	Backlog Item	Status	Notes
MSG-2	Send and receive messages in a conversation thread.	Still To Be Completed	Not yet started.
MSG-3	Link a conversation to a listing or offer.	Still To Be Completed	Would support negotiation before payment or facility booking.
MSG-4	Show unread message counts or conversation updates.	Still To Be Completed	Not yet started.

Section 6: Payments

Requirement: Integrate a 3rd-party payment gateway. Students pay full or partial amounts online; cash shortfall tracked and confirmed before release.

ID	Backlog Item	Status	Notes
PAY-1	Integrate a payment gateway.	Still To Be Completed	No payment provider integrated.
PAY-2	Allow full payment for a listing or order.	Still To Be Completed	No checkout flow exists yet.
PAY-3	Allow partial payment and track outstanding cash amount.	Still To Be Completed	Needs transaction and payment ledger data models.
PAY-4	Allow staff to confirm outstanding cash settlement before item release.	Still To Be Completed	Depends on trade facility workflow and staff role.

Section 7: Rating and Trust System

Requirement: After a completed transaction, both parties can leave ratings and reviews. Admins can flag or remove abusive content.

ID	Backlog Item	Status	Notes
RT-1	Allow buyer and seller to rate each other after a completed transaction.	Still To Be Completed	Not yet started.
RT-2	Allow written reviews after completed transactions.	Still To Be Completed	Not yet started.
RT-3	Show seller trust signals — rating average and review count.	Still To Be Completed	Needed for buyer confidence before commitment.
RT-4	Provide admin moderation tools to flag or remove abusive reviews.	Still To Be Completed	Depends on Admin role and moderation workflows.

Section 8: South African Data Integration

Requirement: Item price suggestions informed by publicly available South African consumer price data relevant to the category. Source must be justified.

ID	Backlog Item	Status	Notes
SA-1	Research a suitable public South African data source for item price guidance.	Still To Be Completed	No source documented yet.

ID	Backlog Item	Status	Notes
SA-2	Document why the chosen source is suitable for the project backlog.	Still To Be Completed	Still needed for backlog completeness.
SA-3	Use SA data to inform listing price suggestions by category.	Still To Be Completed	No price suggestion logic exists yet.

Section 9: Analytics and Reporting

Requirement: At least 3 dashboard reports — popular categories/transactions over time, trade facility utilisation vs capacity, flagged content summary. Exportable as CSV or PDF.

ID	Backlog Item	Status	Notes
AN-1	Show listing counts and listing value summary for the current seller.	Completed	Dashboard supports active count, sold count, active value, and listed this month.
AN-2	Show category summary and listing trend charts.	Completed	Dashboard includes top categories and monthly listing activity.
AN-3	Report on completed transactions over time.	Partially Completed	Sold listings are counted, but no real transaction history model yet.
AN-4	Report on trade facility utilisation versus slot capacity.	Still To Be Completed	Blocked until trade facility booking features exist.
AN-5	Report on flagged or moderated content.	Still To Be Completed	Blocked until moderation and reviews exist.
AN-6	Export reports as CSV.	Still To Be Completed	No export functionality exists yet.
AN-7	Export reports as PDF.	Still To Be Completed	No report export functionality exists yet.

Section 10: Bonus — AI Price Suggestions

Bonus requirement: Use an ML model to recommend listing prices based on category, condition, and recent comparable sales on the platform.

ID	Backlog Item	Status	Notes
AI-1	Collect comparable listing and sale data for training or heuristic recommendations.	Still To Be Completed	Requires richer transaction history and listing dataset.
AI-2	Build a pricing suggestion engine using category, condition, and comparable sales.	Still To Be Completed	Not yet started.
AI-3	Surface suggested price guidance in the listing creation flow.	Still To Be Completed	Would fit naturally into listings.html later.

Current Sprint Position

What the App Can Demonstrate Now	Recommended Next Priorities
----------------------------------	-----------------------------

• Secure account creation and sign-in via Supabase Auth • Protected pages using session checks • Profile maintenance for student users • Live listing CRUD backed by Supabase database and storage • Live marketplace browsing with listing details • Basic seller dashboard analytics with charts • Database protection through Row Level Security policies

1. Finish buyer browsing — add condition and price-range filters
2. Create transaction domain to enable purchases, trade offers, and history
3. Add messaging to unlock negotiation and support trade facility workflows
4. Implement Trade Facility Staff and Admin role model with booking flows
5. Add ratings, moderation, and extended analytics once transactions exist
